Optimal service

Reliability, punctuality and the greatest possible flexibility are the most important prerequisites for successful transport. That is why we take care of your freight completely!

Our service starts with the choice of the optimal means of transport, includes time and route planning and goes far beyond unloading at the destination. Through the perfect coordination of loading and unloading points and the precise coordination of all parties involved, we also handle large-volume orders smoothly and without additional work for the customer.

Challenge us

We inform you continuously about the current status of your transport! The transit time of your transport goods is monitored online and without gaps. In addition, our drivers are in constant contact with the scheduling department. Employees who supervise your order have decision-making authority! This enables us to implement changes or further requests within the shortest possible time.

Freight forwarding – moving things together

As a freight forwarder, we have the mission of organising and carrying out the transport of products and goods for our customers. We take care of the planning, coordination and processing of transport orders and ensure that the goods reach their destination safely and on time.

Our range of services includes not only the pure transport, but also the storage, packaging and insurance of the goods.

As an experienced freight forwarder, we know the requirements and challenges of the transport business and have a wide network of partners and suppliers. This allows us to react flexibly and quickly to changes or special requirements and always offer our customers a reliable and efficient transport solution.

Our goal is to provide our customers with an optimal service and support them in the handling of their transport orders. To achieve this, we rely on state-of-the-art technology and high-quality standards when selecting our partners and employees.

As a forwarding agent, we pride ourselves on offering our customers a comprehensive range of services in the field of transport and logistics. We do everything we can to exceed their expectations and build long-term business relationships.

Logistics – the basis for good transports

As a logistics company, we understand logistics to mean the planning, control and implementation of all processes that are necessary for the optimal supply of our customers with our products and services.

This involves not only pure transport, but also warehousing, order processing and information flows along the entire supply chain.

Efficient and reliable logistics is of great importance to us, as it not only satisfies our customers, but also makes an important contribution to the cost efficiency and competitiveness of our company. By continuously optimising our logistical processes, we ensure that we can react flexibly to our customers' requirements at all times and that our deliveries reach them on time and in perfect condition.

We therefore continuously invest in our logistics infrastructure and rely on modern technologies to ensure transparent and efficient management of our supply chains. At the same time, we make sure that our logistics are sustainable and environmentally friendly, thus doing our part to conserve resources and protect the environment.

Overall, we consider logistics to be a central component of our company strategy and are proud that we can offer our customers added value through professional and high-performance logistics.

Our fleet at a glance:

Due to the constant access to various special vehicles, we can flexibly solve almost all transport tasks in local and long-distance transport for you:

13,60 m open semitrailers; 25 t Payload; with and without stanchions	Walking floor truck / up to 92 m ³ volume; approx. 24 to. Payload
13,60 m box trailer; approx. 22 t Payload	Tank and silo trailers; with own blower
13,60 m refrigerated / Thermo trailer; approx. 22 t Payload	Transporter / Sprinter
13,60 m semi low-loader; 25 t Payload; extendable with ramps	

Conventional Transports – are our daily bread

Years of experience in transporting conventional products make us strong and reliable.

GETRA Logistics has extensive „equipment“ in terms of vehicle fleet, crew and technical equipment. Should we nevertheless reach our limits for extraordinary challenges, we are networked with numerous partners with whom we can count on rapid support in special cases. Your goods are in good hands with us.

The basis for perfect transport already lies in the planning. The choice of vehicle and route are decisive aspects, but loading and unloading are also important criteria for reliability and punctuality.

Should unforeseen events occur, our drivers are authorised to quickly and independently reschedule and individually find the best way to get to their destination on schedule.

We'll work hard and find the right solution for your transport!

Bulk Transports – this is what we are specialised in

GETRA Logistics is also the right choice for bulk goods transports.

Qualified specialists are at your side to advise you on your individual transport. Particular attention is paid to the type of bulk material and the associated loading and unloading requirements.

We pick up your bulk goods quickly, cleanly and reliably and deliver it directly to its destination on time. Thanks to our many years of experience and expertise in transporting bulk goods, we are able to meet the constantly changing legal requirements, even for loose material.

State-of-the-art vehicles, excellently qualified and always up-to-date trained drivers always achieve a seamless, safe and reliable transport.

Waste Transports in Europe – professional recycling!

A flourishing economy is characterised by lively trade. Accordingly, a lot of waste is produced. Waste transports are part of the economic cycle and require permission according to the Closed Substance Cycle Waste Management Act (KrWG).

Waste transports are also part of our range of services. Among other things, we are equipped with the German transport permit according to § 53 KrWG as well as other European transport permits and are therefore qualified to transport waste across borders.

Our employees and subcontractors are always up to date with the latest legal guidelines thanks to regular training and further education.

GETRA Logistics guarantees a strong and clean operation with its team, know-how and vehicle fleet!

Frigo Transports – very cool on the road

To ensure the quality of your temperature-sensitive goods, we offer transports under reliable climatic conditions. We are aware of our responsibility and take great care to comply with the strict legal regulations.

Our drivers and dispatchers always keep an eye on the temperature, have the necessary experience and can thus guarantee an uninterrupted cold chain even for transports over longer distances.

The spectrum of our temperature-controlled transports ranges from frozen products with arctic conditions to products that prefer spring-like temperatures.

Your products are cool on the road with us!

Special Transports – for very special wishes

Bigger - longer - wider. However, this does not only apply to the transported goods, GETRA Logistics counters this with correspondingly large vehicles.

It often seems unbelievable what is transported on the road. For the GETRA Logistics team, the realisation of a special transport is a welcome challenge.

We take on this special task professionally and competently and take care of the necessary interlocking processes – from transport planning to delivery at the destination.

GETRA Logistics takes care of the basic pillars of logistics such as route planning, loading and unloading, provision of support vehicles, obtaining permits and is only satisfied when the process has been successfully completed.

Dangerous goods transports - dangerously good on the way

As experts in the transport of hazardous goods, we specialize in transporting your dangerous goods safely and reliably to their destination. In doing so, the safety of your freight always comes first. With our extensive expertise and many years of experience, we are able to transport any type of dangerous goods safely and efficiently.

Our modern fleet is equipped with the latest technologies and safety precautions to ensure the highest level of safety. Our employees are trained in accordance with ADR guidelines to identify hazards at an early stage and take appropriate measures to minimize risks and ensure the safe transport of your goods. In doing so, we work closely with our customers to develop individual solutions for every transport requirement.

We place great emphasis on complying with all applicable laws and regulations and maintaining the highest safety standards. Our goal is to provide you with a first-class service and ensure the safety of your goods at all times. Contact us today to learn more about our range of dangerous goods transport services and to commission¹ us to transport your goods safely and reliably.
